EDUCATION

SASTRA Deemed University

Bachelor of Technology in Computer Science & Business Systems

Thanjavur, Tamil Nadu

2022 – 2026

- CGPA: 7.15 / 10
- Relevant Coursework: Data Structures, DBMS, Operating Systems, OOP, Computer Networks, Web Development, Machine Learning

PROJECTS

Stock Price Forecasting using Dynamic Graph Attention Networks | Python, PyTorch, GATConv, LSTM, PyTorch Geometric, Jan 2026 – May 2026

- Replaced standard Graph Convolution with a 4-head Graph Attention Network (GATConv) to learn adaptive influence weights between 500+ financially similar stocks across NASDAQ-100 and S&P 500.
- Implemented dynamic re-clustering every 60 days on a rolling 1-year window and a Spatial Encoder MLP using Pearson correlation to enrich node features beyond raw price data.
- Achieved 23.7% lower MAE and 30.8% lower MSE over the base model with final test MAE = 0.0621 and MSE = 0.0072 on NASDAQ-100.

HealthCheck – AI-Based Symptom Checker Web Application | Flask, Python, SQLite, HTML, CSS

- Developed a full-stack Flask web application that analyzes user-entered symptoms and provides probable disease suggestions using a symptom-to-disease mapping system.
- Implemented user authentication, symptom history storage, first-aid recommendations, and automated PDF report generation.
- Designed a modular architecture using Flask and SQLite while following SDLC practices including requirement analysis, testing, and documentation.

Crop Yield Prediction System | Python, Random Forest, Pandas, NumPy, Streamlit

- Built a Random Forest-based ML model using soil and weather datasets to predict crop yield with approximately 85% accuracy.
- Performed data preprocessing, feature selection, model evaluation, and result visualization.
- Deployed an interactive Streamlit prototype for prediction analysis.

Diabetes Prediction – Machine Learning Project | Python, SVM, Logistic Regression, scikit-learn

- Implemented and compared SVM and Logistic Regression models for diabetes prediction.
- Conducted feature validation, performance testing, and error analysis on healthcare datasets.

TECHNICAL SKILLS

Programming: Python, C++, C, Java (Basic), JavaScript (Basic)

Deep Learning: PyTorch, PyTorch Geometric, GCN, GAT, LSTM, Graph Neural Networks

Machine Learning: scikit-learn, Pandas, NumPy

Web Development: Flask, HTML5, CSS3, SQLite, REST APIs

Tools: Git, GitHub, Streamlit, Jupyter Notebook

Concepts: SDLC, OOP, Debugging, Testing, Documentation, Time Series Analysis, Financial Forecasting

CERTIFICATIONS

- Introduction to Artificial Intelligence – Coursera (2025)
- Data Science – Infosys Springboard (2025)
- Databases with Python (MySQL, SQLite, MongoDB) – Udemy (2025)
- Career Essentials in Software Development – Microsoft & LinkedIn (2024)
