Professional Summary

Computer Science graduate with strong knowledge of **Core Java**, **Object-Oriented Programming**, **REST APIs**, **SQL**, **SDLC**, backend application development and software engineering principles. Experienced in developing modular web applications, integrating databases, debugging software, and building scalable solutions. Familiar with **Spring Boot**, **Microservices**, Git and Agile development methodologies. Passionate about backend engineering and enterprise software development.

Education

SASTRA Deemed University, Thanjavur

Bachelor of Technology in Computer Science and Engineering

2022–2026

CGPA: 7.13/10

Relevant Coursework: Data Structures, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Web Development.

Technical Skills

Programming Languages: Java, Python, C++, JavaScript

Backend Technologies: Flask, **Core Java**, **REST APIs**, JSON

Databases: **SQL**, MySQL, SQLite

Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

Concepts: **OOP**, **SDLC**, Debugging, Testing, Documentation, Version Control, Problem Solving, Backend Development, Application Development, Agile

Projects

HealthCheck – Symptom Checker Web Application

- Developed backend modules using Python, Flask and **REST APIs**.
- Integrated **SQLite** database for user authentication and medical history.
- Implemented JSON-based communication between frontend and backend.
- Followed **Object-Oriented Programming**, **SDLC**, testing and documentation practices.
- Generated automated PDF reports and modular backend components.

Stock Price Forecasting using Dynamic Graph Attention Networks

- Built scalable data processing modules using Python and PyTorch.
- Optimized application performance for financial datasets.
- Performed debugging, testing and model evaluation.
- Developed reusable modular software components.

Crop Yield Prediction System

- Developed prediction software using Python and Streamlit.
- Performed data preprocessing, feature engineering and model evaluation.
- Designed reusable software modules following OOP principles.

Certifications

- Career Essentials in Software Development – Microsoft & LinkedIn
- Databases with Python (MySQL, SQLite, MongoDB)
- Introduction to Artificial Intelligence – Coursera
- Data Science – Infosys Springboard

Core Competencies

Core Java, Spring Boot, REST APIs, Microservices, SQL, Backend Development, Application Development, Object-Oriented Programming, SDLC, Debugging, Testing, Version Control, Problem Solving, Documentation, Agile.
